We'll help you grow!

TOP NEWS OF THE MONTH

BACK BY HIGH DEMAND: MIKE'S CULTIVATION CLASS <<<

For the many who have been inquiring about Mike's Cannabis Cultivation Class, **registration is now open!** This introductory class focuses upon personal, indoor cultivation techniques and covers an array of fundamental topics. Attendees are able to ask Michael Jernigan, Master Gardener and Grower, specific one-on-one questions. Those who attend class will receive **10% OFF anything in the store**, after class (valid ONLY on class date) and a **FREE pack of 10 feminized seeds**. The next class date is **Wednesday, November 6th, at 7:15 p.m.**

>>> NOW I KNOW MY CBDs: LEARNING OBJECTIVES

- Seed Germination techniques.
- Light cycles for various stages of growth.
- Different types of growing media, pros and cons.
- Tips, tricks, do's and don'ts for the top 3 growing methods: organics, coco, and hydro.
- Nominal values for pH, temperature, and humidity.
- How to set up, use and overall best practices for CO2 enrichment.
- Common deficiencies seen and how to combat them.
- Drying and curing DO's and DON'Ts.
- IPM (Integrated Pest Management) recommendations.

BLACK *Seed Give-Away & Sale* FRIDAY

ON **NOVEMBER 29TH**, YOU'RE GANJA WANT TO BRING A BUDDY AND JOIN THE ONLY **BLACK FRIDAY** LINE THAT IS WORTH THE WAIT! THE **FIRST 100** PAYING CUSTOMERS ARE ALLOWED **ONE FREE* FEMINIZED SEED PACK** - YOU SIMPLY MUST BE AT LEAST 21 YEARS OF AGE, WITH A VALID ID UPON PURCHASE (NO EXCEPTIONS), IN ORDER TO COLLECT YOUR FREE* SEEDS. DEALER'S CHOICE BETWEEN **TROPICAL GELATO*** AND **CHIMERA***. IN ADDITION, WHILE SUPPLIES LAST, PAYING CUSTOMERS ARE WELCOME TO TAKE ONE FREE* QUART OF SOUL SENSEI GROW AND MICRO NUTRIENTS. BUT WAIT, THERE'S MORE -- LASTLY, A **STOREWIDE DISCOUNT OF 15%** WILL BE APPLIED TO EACH PURCHASE. BE SURE TO WATCH OUR WEBSITE AND FACEBOOK FOR ALL OF OUR BLACK FRIDAY ANNOUNCEMENTS! DOORS OPEN FROM **10:00 A.M. UNTIL 7:00 P.M.**

***FREE FEMINIZED SEEDS (FIRST 100 CUSTOMERS) AND A FREE QUART OF SOUL SENSEI GROW AND MICRO NUTRIENTS (WHILE SUPPLIES LAST), WITH ANY PURCHASE.**

****NOT TO BE COMBINED WITH PROMOTIONAL DEALS. All deals valid on Friday, 11/29/24, from 10am to 7pm ONLY, WHILE SUPPLIES LAST.**

PENINSULA HYDROPONICS' GENETICS MENU

>>> FEMINIZED PHOTOPERIOD SEEDS

3

IMPORTANT ANNOUNCEMENT: As most of you are aware, we have been working hard on our fall seed project. When working with new genetics, we never know how successful we will be and what results we will get until we go to harvest. After months of effort and hard work, unfortunately it doesn't appear this seed project was as fruitful as our spring seed project. With that being said, we are still hard at work to see what we will and won't have available for our fall menu. Stay tuned for an official announcement in mid-November, detailing the varieties we will have available, but please keep in mind some varieties will be extremely limited. We were just as excited (if not more!) about these new crosses, so we apologize for any inconvenience.

The Blues Collection

*All of the genetics contained within this line have been crossed with Blue Zushi.

LOW STOCK

BLUE ZUSHI*

Blue Zushi is the modern definition of purple candy gas. She is incredibly frosty with her own signature morphology. As she fades into a gorgeous dark purple, her terps become so sweet and loud that they cut through most everything. This exotic beauty makes you a better grower than you truly are. Original genetics via Pop Genetics.

BLACKBERRY OREOZ*

LOW STOCK

Blackberry Oreoz fades into a beautiful purple-green senescence, paired with frosty chocolate-diesel and berry terps. She exhibits a strong structure (corresponding to a strong yield), and is resistant to mold and pest pressure. A must-have, this gal boasts incredible bag appeal. Original genetics via Copy Cat Genetics

GORILLA GLUE #4*

LOW STOCK

Gorilla Glue #4 is THE tried and true classic with adhesive-like terps. Her high potency, gorgeous structure, and STICKY resin production (hence the name) have secured her legendary status. She features dense, frosty buds with a range of vibrant colors, from green to orange. Original genetics via GG Strains LLC (Josey Wales).

PEANUT BUTTER BREATH*

Peanut Butter Breath is a true treat with her raunchy, earthy, and nutty scent overload. Her deep purple leaves give way to bountiful yields of green and lavender nugs, decorated with bright orange pistils. A natural bronchodilator, this queen will take your breath away. Original genetics via ThugPug.

CHIMERA #3*

LOW STOCK

Chimera #3 is renowned for her exceptional trichome production, appearing sparkly and very sticky. Be warned, this strain is LOUD due to its Cheerwine/Cough Syrupy terps. She produces a high yield, while remaining short and stout, making for a perfect indoor grow. Original genetics via Beleaf.

TRIANGLE MINTS*

LOW STOCK

Triangle Mints, AKA The Wedding Cake Cut, is a resin-coated, gorgeous green Queen known for her dense buds. She is sticky, sweet and fuel, all at once. Truly, a blend of a bakery and gas station in your lungs. Original genetics via JBeezy of Seed Junky Genetics.

TROPICAL GELATO*

Tropical Gelato does not disappoint with her orange icecream terps and crystal-laden bud structure. This beauty yields dense, purple-green buds interlaced with deep orange hues. Fairly resistant to pests, this citrus cream varietal stands the test of time. Original genetics via Lit Farms.

PHILLY RUNTZ*

Philly Runtz is an extremely popular cultivar and for good reason. Not only does she smell like a bag of candy, she has massive bag-appeal as her glistening lime green buds give off a mesmerizing purple hue. Philly Runtz offers growers the true trifecta: she is remarkably hardy, easy to grow, and provides an impressive yield. Original genetics via Copy Cat Genetics.

SLURRICANE #7*

Slurricane #7 is cherished for her sweet flavor profile and knock-out effects. Her buds are both dense and covered in trichomes, giving an exceptionally frosty appearance. As a combination of sweet, fruity and earthy flavors, mixed with a hint of spice, Slurricane #7 tastes as good as she looks! Original genetics via Inhouse Genetics.

MOONBOW 112*

LOW STOCK

Moonbow 112 is the perfect late-night snack. This Sleepy-time Beauty is dripping with blackberry currant and zingy lime zkittles terps. She grows quickly into a well structured plant and yields grenade sized frosty buds. Original genetics via Archive Seed Bank.

GERMINATION & SEEDLING CARE

MARY, MARY, QUITE CONTRARY; HOW DOES YOUR GARDEN GROW?

▶▶▶ LET'S GET HIGH-ER RATES OF SUCCESSFUL GERMINATION

While there are many methods of germinating seeds, germination within a wet paper towel remains among the most popular and successful techniques. With freshly washed hands, soak a paper towel in clean, sterile water. Set your desired number of seeds in the paper towel; fold and place in a Ziploc bag. Cannabis seeds germinate best in warmer temperatures, between 75-80 degrees Fahrenheit. Wait anywhere from 12 hours to 7 days until tap roots come through. Some seeds will take longer depending on their genetics/age. Place germinated seeds in small square pots with starter soil (FoxFarm Happy Frog) and water thoroughly. The light cycle should begin at 18 hours on and 6 hours off, with lights DIMMED VERY LOW.

▶▶▶ GROWING LIKE A WEED: SEEDLING PHASE

Ideally, young seedlings should be kept in temperatures between 75 and 80 degrees Fahrenheit. Water your plants when the soil is lighter in color and dry, especially in the seedling stage. It is important to allow the soil to dry thoroughly between watering in order to prevent fungal infections and damping off. Place your lights above grow media, following the manufacturer's recommendations. At this stage, the ideal PPFD is between 200-400 μmol . Continue the seedling regimen for 2-4 weeks, using only water. You can also include microbes, such as Fish Sh!t, when watering.

MIKE'S PRO-TIP

If you have older seeds or just want to increase your germination odds, soak seeds in a solution of kelp and water for about 24 hours, prior to placing in a paper towel. The Gibberellic acid in kelp is what triggers the release of enzymes in seeds that begin the germination process – hence, resulting in a faster germination rate and a lower risk of germination failure.

Seedling Must-Haves:

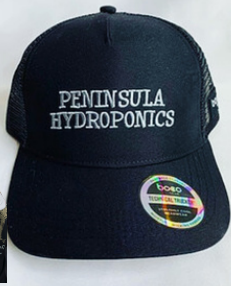

- FoxFarm Happy Frog Soil
- Coco Coir
- Perlite
- Rockwool
- Kelp/Seaweed Extract
- Small Square Pots
- Super Sprouter Humidity Dome
- Jump Start Seedling Heat Mat
- Lights (T-5, LED)
- Light Control/Timer
- Great White
- Recharge
- Fish Sh!t
