HOT STUFF: MIKE'S HIGHLY ANTICIPATED SPRING SEED MENU

Mike is excited to share that he has been working diligently on the following FaceOff OG Kush crosses: **FaceOff OG Kush S1, Triangle Mints, Blue Zushi, Permanent Marker, UK Cheese, and Sour Diesel BX**. It appears as if this seed-crop will be quite fruitful. However, *when working with new genetics, it is difficult to gauge how successful of a result we will achieve until we go to harvest. As such, please bear in mind that this seed menu is tentative, in nature, and subject to change.*

Blumat® Watering Systems

▶▶▶ I WATER YOU, YOU WATER ME;
WE GROW TOGETHER.

\$149.95

The **heart** of the Blumat products is the clay cone. It is in direct contact with the soil and the roots and measures the moisture exactly where it is important. Each clay cone is a stand-alone sensor that regulates the release of water independently. As a result, every individual plant regulates its watering itself, totally individually and as required. You save time and money and enjoy healthy, beautiful plants.

ASSEMBLING THE TROPF-BLUMAT SENSORS

1. Unscrew the top parts and screw them back together underwater. Every Tropf-Blumat (sensor) must be filled completely with water.
2. Leave the sensors filled with water and screwed together in the water for at least 15 minutes.

3. **This step is particularly important.** Water the soil in all plant pots thoroughly several times before further assembly.

4. Stick a Tropf-Blumat into the moist soil next to every plant (approx. 10-15 cm away from the plant). The clay cone must be covered completely by soil, press down loose soil.

5. Connect the flexible drip tube to the T-piece or the end-piece and push it through the Tropf-Blumat. The end must protrude approx. 8 cm out of the Tropf-Blumat and should be near to the plant. Finally tighten the setting screws.

SETTING

- Turn on the water tap and check that all the sensors are “closed”. There must be no drips coming from anywhere! If necessary, tighten the setting screw further.
- Begin with the setting at the last Tropf-Blumat in the system so that the system is vented.

- Since the soil is moist, the Tropf-Blumat may not discharge any water. Watering does not begin until the soil is dry. Now make the setting for every single Tropf-Blumat that is being utilized in your watering systems.

DOPE DEALS

PENINSULA HYDROPONICS' GENETICS MENU

MIKE'S FEMINIZED PHOTOPERIOD SEED VAULT

BLUE ZUSHI*

The Blues Collection*

*All of the genetics contained within this line have been crossed with Blue Zushi.

Blue Zushi is the modern definition of purple candy gas. She is incredibly frosty with her own signature morphology. As she fades into a gorgeous dark purple, her terps become so sweet and loud that they cut through most everything. This exotic beauty makes you a better grower than you truly are. Original genetics via Pop Genetics.

FACEOFF OG KUSH*

LIMITED STOCK

FaceOff OG Kush, is a 90's CULT-CLASSIC! A strain not intended for the lightweights, she is revered for her overwhelmingly unique flavor and a skull crushing high - that starts in the head and face, thus the name. Her dense, resinous lime-green buds are covered in red pistils and give off a sweet, earthy, and piney odor. Original genetics via Archive Seeds.

BLACKBERRY OREOZ*

LIMITED STOCK

Blackberry Oreoz fades into a beautiful purple-green senescence, paired with frosty chocolate-diesel and berry terps. She exhibits a strong structure (corresponding to a strong yield), and is resistant to mold and pest pressure. A must-have, this gal boasts incredible bag appeal. Original genetics via Copy Cat Genetics

GORILLA GLUE #4*

LIMITED STOCK

Gorilla Glue #4 is THE tried and true classic with adhesive-like terps. Her HIGH potency, gorgeous structure, and STICKY resin production (HENCE THE NAME) have secured her legendary status. She features dense, frosty buds with a range of vibrant colors, from green to orange. Original genetics via GG Strains LLC (Josey Wales).

PEANUT BUTTER BREATH*

Peanut Butter Breath is a true treat with her RAUNCHY, EARTHY, and NUTTY scent overload. Her deep purple leaves give way to BOUNTIFUL YIELDS of green and lavender nugs, decorated with bright orange pistils. A natural bronchodilator, this queen will TAKE YOUR BREATH AWAY! Original genetics via ThugPug.

TRIANGLE MINTS*

LIMITED STOCK

Triangle Mints, ALSO KNOWN AS THE WEDDING CAKE CUT, is a resin-coated, GORGEOUS green Queen known for her DENSE BUDS. She is STICKY, SWEET and FUEL all at once. Truly, a blend of a bakery and gas station in your lungs. Original genetics via JBeezy of Seed Junky Genetics.

TROPICAL GELATO*

Tropical Gelato does not disappoint with her orange ICE CREAM TERPS and crystal-laden bud structure. This beauty yields DENSE, PURPLE-GREEN BUDS interlaced with deep orange hues. FAIRLY RESISTANT TO PESTS, this citrus cream varietal stands the test of time. Original genetics via Lit Farms.

PHILLY RUNTZ*

Philly Runtz is an extremely popular cultivar and for good reason. Not only does she smell like a BAG OF CANDY, she has massive bag-appeal as her glistening lime green buds give off a mesmerizing purple hue. Philly Runtz offers growers the true trifecta: she is remarkably hardy, easy to grow, and provides an impressive yield. Original genetics via Copy Cat Genetics.

SLURRICANE #7*

Slurrricane #7 is cherished for her SWEET flavor profile and KNOCK-OUT EFFECTS. Her buds are both DENSE AND COVERED IN TRICHOMES, giving an exceptionally frosty appearance. As a combination of sweet, fruity and earthy flavors, mixed with a hint of spice, Slurrricane #7 TASTES AS GOOD AS SHE LOOKS! Original genetics via Inhouse Genetics.

MOONBOW 112*

LIMITED STOCK

Moonbow 112 is the perfect late-night snack. This SLEEPY-TIME BEAUTY is dripping with BLACKBERRY CURRANT and ZINGY LIME ZKITTLEZ TERPS. She grows quickly into a well structured plant and yields GRENADE-SIZED FROSTY BUDS. Original genetics via Archive Seed Bank.

OUR GIFT TO YOU: FREE SEEDS*

»»» THE HOTTEST DEAL OF THE MONTH

This month only, **customers who spend \$100.00 or more will receive one free 5-pack of feminized seeds.** Yup, you read that right! Each week, a different FaceOff OG Kush cross from Mike's Seed Vault will be offered with purchases that total \$100.00 or more - ONE PACK PER CUSTOMER, PER DAY.

Flavor of the Week

Week of February 1st

FaceOff OG Kush, is a 90's CULT-CLASSIC! A strain not intended for the lightweights, she is revered for her overwhelmingly unique flavor and a skull crushing high - that starts in the head and face. Original genetics via Archive Seeds.

Week of February 8th

Blue Zushi is the modern definition of purple candy gas. She is incredibly frosty with her own signature morphology. This exotic beauty makes you a better grower than you truly are. Original genetics via Pop Genetics.

Week of February 15th

Permanent Marker is a potent strain that leaves a lasting effect. Boasting a minty aroma with hints of pepper, gas, and cookies, as well as sky-high THC levels, it's no wonder this strain has become so popular. Original genetics via Seed Junky.

Week of February 22nd

Sour Skunk Ape is a cross of the legendary Sour Diesel and Skunk Ape Sour (a mashup of Loompa's Headband, Super Skunk, and Stardawg). With such lineage, this sour queen packs quite a punch! Original genetics via Premedicated Genetics.

Faceoff OG Kush is a heavy indica-dominant strain. All of the genetics listed above have been crossed with Faceoff OG Kush.

* SPEND \$100 OR MORE AND RECEIVE A FREE 5-PACK OF FEMINIZED SEEDS. ONE PACK PER CUSTOMER, PER DAY.

PENINSULA HYDROPONICS' Spring Plant Sale
